Subject: Mid Devon Local Plan Review – Proposed Main Modifications - Highways England response
Date: 13 January 2020 13:45:02
Attachments: [Modifications requested by Highways England -Table \(002\).pdf](#)

Dear Mid Devon District Council,

Thank you for consulting Highways England on the proposed Main Modifications relating to the Mid Devon Local Plan Review.

Highways England wrote to Mid Devon District Council (MDDC) prior to Examination on 11 February 2019, requesting that modifications be made as listed in the attached table. These amendments were agreed within the Statement of Common Ground (SCG-10) between MDDC, Devon County Council and Highways England, as acknowledged in the MDDC Schedule of Proposed Main Modifications dated November 2019.

Based on the Schedules of Proposed Main and Additional Modifications dated November 2019, we are content that the majority of our requested modifications have been incorporated. We would however like to note that in respect of Policy CU2, CU8, CU12, CU17 and CU17, our requested wording requiring the undertaking of Transport Assessments to determine the impact of development traffic has been substituted with the need to undertake 'Capacity Studies'.

On the basis of our understanding that the definition of 'Capacity Studies' will include appropriate assessment in line with the requirements and scope of Transport Assessments, we are content with the Modifications as proposed. We would therefore welcome clarification from the Council on their definition of 'Capacity Studies' to ensure this matter is agreed.

Kind regards,

Sally

Mid Devon Local Plan Review – Proposed Main Modifications

Posted on: 03-01-2020

Posted in: Planning

**Council invites public comments on
proposed main modifications to help finalise
the new local plan.**

The Mid Devon Local Plan Review was submitted to the Planning Inspectorate in March 2017 for examination. Public hearings were held in September 2018 and February 2019, which provided an opportunity for people to have their views heard by

an independent Inspector.

The Council has now published a package of 55 proposed main modifications to the plan following the Inspector's advice for changes to make it 'sound' and capable of being adopted. These include bringing forward development sooner at Higher Town, Sampford Peverell and also at Colebrook, Cullompton where there are no restrictions on timing, to address his concerns about housing supply in the early years of the plan, and providing a more flexible approach for Gypsy and Traveller sites.

The proposed **main modifications**, together with updates needed to the **Sustainability Appraisal, Habitat Regulations Assessment and Equalities Impact Assessment**, and **additional (minor) modifications** are published for a 6 week consultation. Comments on these documents must be made in writing and reach the Council by **5:00pm on 17 February 2020**. With the exception of comments on the **additional (minor) modifications** which will be considered by the Council, the consultation documents and comments received will be sent to the Inspector for him to decide whether further hearings are needed and help him prepare his final report.

Comments are not being invited on the unchanged content of the Local Plan that was submitted to the Planning Inspectorate.

An online form will be available for comments. More information about the consultation will be on the Council's website, visit middevon.gov.uk/LPRMainMods.

Councillor Graeme Barnell, Cabinet Member for Planning and Economic Development said:

"It's exciting to reach the final stages of producing our Local Plan for Mid Devon. With the changes suggested in this consultation, we believe we'll have a Local Plan we can adopt. It will deliver sustainable development that reflects the aspirations of our district and help address climate change, provide for new homes, jobs, community facilities, transport and other infrastructure that can meet our needs. Most importantly, it will help to protect Mid Devon from speculative and unplanned development.

"I appreciate that the Local Plan is a long and complex document, but I would encourage anyone with any comments

on the main modifications to participate in this important consultation for consideration by the Inspector."

About this consultation:

Consultation takes place from **6 January 2020 to 17 February (5:00pm) 2020.**

The Council's proposed **Main Modifications**, the **Addendum to the Sustainability Appraisal**, **Addendum to the Habitat Regulations Assessment**, **Addendum to the Equalities Impact Assessment** and all comments made on these will be sent to the Inspector for his consideration. Comments on the Local Plan Review **Additional (Minor) Modifications** will be considered by the Council.

The consultation documents, response form and supporting guidance will be available to view online at middevon.gov.uk/LPRMainMods, our main offices at [Phoenix House](#) and at all public libraries in Mid Devon (including the mobile library) during normal opening hours for the duration of the consultation.

Comments must be made in writing and can be made in the following ways:

- Online:** middevon.gov.uk/LPRMainMods
(preferred method) The online form is also available for downloading and printing for submission by email or post

	Devon County Council’s Strategic Highways Option Report (2014) sets out an initial assessment of the various elements phasing of transport infrastructure needed to service the site. A scheme, referred to in the report and scheduled to be delivered during 2014/15, only provides sufficient capacity for the allocations contained with the previous Local Plan. A signalisation scheme at junction 28 of the M5 was undertaken in 2015. However this scheme does not produce junction capacity to accommodate this development. The first phase referred to in criterion (f) above therefore only relates to the subsequent highway works set out in the Devon County Council report. The Council has been working closely with statutory consultees to ensure emerging proposals for junction 28 M5 improvements are appropriately designed.
